

Russell Indexes at a glance

Russell 1000® Equal Weight Index

About the index.

The Russell 1000 Equal Weight Index equally weights each sector and then equally weights securities within the sectors in the Russell 1000® Index. This results in indexes providing greater diversification benefits across all size segments and sectors by providing sector equal weight exposure, as compared to typical equal weighting approaches, which apply the same weight to each security in the index. The index is re-weighted on a quarterly basis and captures the performance of an equal weight investment strategy for U.S. large-cap stocks.

The Russell 1000 Index measures the performance of the large-cap segment of the U.S. equity universe. It is a subset of the Russell 3000® Index and it represents approximately 92% of the U.S. market. It includes approximately 1,000 of the largest securities based on a combination of their market cap and current index membership. The Russell 1000 Index is constructed to provide a comprehensive and unbiased barometer for the large-cap segment and is completely reconstituted annually to ensure new and growing equities are reflected.

Index characteristics

(as of 3/29/2013)

Russell 1000® Equal Weight Index Russell 1000® Index

Better tools for better investing

Deep, comprehensive market coverage.

Russell indexes represent over 98% of the investable universe.

Completely objective. Russell indexes are constructed using rules-based, transparent methodology for creating ideal benchmarks and trading vehicles. There is no sampling.

Modular and accurate. Russell indexes are modular in their design with a consistently applied methodology. The indexes have consistent market cap breaks to determine which companies are large cap and small cap.

Rigorously maintained. Daily corporate actions, monthly share adjustments, quarterly IPO inclusions and annual total reconstitution ensure that the indexes accurately represent the true opportunity set.
